DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 11 is rejected under 35 U.S.C. 102(a and e) as being clearly anticipated by McNichols et al (US Patent 6,547,903).

McNichols discloses a rotary ultrasonic bonder. As shown in the figures, the ultrasonic welding device (20) comprises a continuously drivable roller sonotrode (28) and an anvil (86) arranged opposite the roller sonotrode, wherein the distance between the roller sonotrode and the anvil may be changed, and wherein the subjects may be pressed together between the roller sonotrode and the anvil and may be joined together by way of introducing ultrasonic oscillation via the sonotrode, wherein the welding power of the roller sonotrode may be closed-loop controlled by way of a control. See Figs. 16-17A and 24, and col. 2, lines 5-17, col. 9, lines 2-12, col. 27, line 62 through col. 28, line 16, col. 28, lines 42-47, col. 28, lines 55-67, col. 29, lines 6-18 and col. 33, lines 42-54

Applicant is also reminded that "[e]xpressions relating the apparatus to contents thereof during an intended operation are of no significance in determining the patentability of the apparatus claim." *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App 1969). Furthermore, "Inclusion of material or article worked upon by a structure being claimed does not impart patentability to the claims." *In re Young*, 75 F.2d 966, 25 USPQ 69 (CCPA 1935) (as restated in *In re Otto*, 312 F.2d 937, 136 USPQ 458, 459 (CCPA 1963)).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Dependent claims 12-20 depend from canceled claims 1-10.
